WORK EXPERIENCE

Software Developer Engineer 2 Zynga

09/2018 - Present

Connecting the world through games.

- Optimised the pre-release Export Publish process from almost 2 hours to 30 minutes.
- Optimised the memory and time for local game setup.
- Designed and developed the system to provide custom scripts to run during game load without needing a release.
- Worked on the POC to eliminate the need to archival of old features and create individual game setting objects that can be loaded dynamically based on feature completion.
- Worked on multiple user script to enhance the automation process.

Software Developer BookMyShow

11/2016 - 09/2018

India's Largest Ticket Booking Platform

- Created the complete SEO schema engine for Movies and Events pages.
- Worked on the Identity Access Management tool over the Windows Active Directory, which controls all the internal projects, and user access to the company resources.
- Migrated the existing system from Mandrill Email Service to Amazon Web Services, and optimized the communication services by excluding the complaint and bounce emails.
- Developed Ticket Resaling Module (during Hackthon).
- Successfully build the health monitoring tool to check cinema status.
- End to end development of Queue Manager middleware with monitoring tool.

Software Engineer Incture Technologies

07/2015 - 10/2016

Leading customer engagement technology company

- Designed the end to end system to access data from SAP system to non SAP based backend systems and Mobile services.
- Developed the Mobile Client Application for SAP PO Monitoring. Worked on RESTful services to provide application data.
- Designed and developed the HR Admin for CherryWork from end to end.
